According to the DEA "Practitioner's Manual - An Informational Outline of the Controlled Substances Act" - Section IV (Record Keeping Requirements) - DEA regulations state:

"Disposal of Controlled Substances

A practitioner may dispose of out-of-date, damaged, or otherwise unusable or unwanted controlled substances, including samples, by transferring them to a registrant who is authorized to receive such materials. These registrants are referred to as "Reverse Distributors."... Schedule I and II controlled substances should be transferred via the DEA Form 222, while Schedule III-V compounds may be transferred via invoice. The practitioner should maintain copies of the records documenting the transfer and disposal of controlled substances for a period of two years."
